Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Industrial, Commercial, and Institutional Boilers and Process Heaters apply to existing and new industrial, commercial, and institutional boilers and process heaters located at major sources of HAP. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP. Any owner/operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least five years following the date of such measurements, maintenance reports, and records. All

reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office.

Form Numbers: None.

Respondents/affected entities: Owners and operators of industrial, commercial, and institutional boilers and process heaters.

Respondent's obligation to respond: Mandatory (40 CFR Part 63, Subpart DDDDD).

Estimated number of respondents: 1,778 (total).

Frequency of response: Initially, semiannually, annually, and biennially.

Total estimated burden: 492,702 hours (per year). Burden is defined at 5 CFR 1320.3(b).
